Professional Statement

Dynamic professional with experience in Health, Safety and Quality Management. Validating process changes made and ensuring procedures are updated and well implemented. Highly skilled in business intelligence, audit processes, analytical skills, and quality & safety management. Skilled in managing multi-functional HSE data / matrix and developing a story of performance for High Management level. Strong knowledge in risk management process and contractor safety management process. My career path made me agile and easy fit into multinational work environment and cross-functional projects. I am excited to shape HSE&C up with the new technology and diving in data.

Employment History

HSE&C Advisor - Wells | Jan. 2021 - Present

BP Exploration (Epsilon) Ltd | www.bp.com

HSE & Carbon

I advise Wells Leadership team on improving HSE&C-related performance. I am acting as the HSE&C representative on site for all site HSE&C issues. I coach and support Wells Contractors to meet BP HSE&C expectations and requirements. I am responsible for conducting audit on Wells Contractors. I am responsible to improve incident investigation quality by facilitating Incident Review Board (IRB) meetings. I am sharing with Wells Leadership how Oman Wells shaping up BP HSE performance, as part of monthly Safety & Operational Risk Committee meetings. I am using Human Factors science to improve BP & Contractors' applications, systems, procedures and control rooms.

Key Contribution:

- Led a project to improve incorrect entries / classification of vehicle accident and drop object incidents using AI model.
- Led the project of safety management bridging document for new well test contractor.
- Developed Human Performance dashboard for BP central team, using Power BI.

HSE Advisor - Operations | Mar. 2020 - Dec. 2020

BP Exploration (Epsilon) Ltd | www.bp.com

HSE

I was supporting Operations Site Leadership on managing mixed BP-led and Contractor directed businesses. Coached the Contractor Accountable Manager (CAM)s' site representatives on reviewing contractors' self-verification (SV) schedules as well as developing the BP oversight (OS) schedules. Followed up on system issues with Operations leadership such as strategy of having fire extinguisher in the remote area, 11 KV yard future and first aid re-certification process.

Key Contribution:

- Standing for HSE at 2020 Turnaround & Ghazeer Project Start-up, during Covid19 pandemic.

HSE Advisor - Logistics and Infrastructure (L&I) | Jan. 2019 - Feb. 2020

BP Exploration (Epsilon) Ltd | www.bp.com

HSE

I was responsible to support L&I team and their contractors meet BP expectations in terms of HSE, through establishment of structured audit/ "oversight on contractors" process. Played significant role to strengthen incident, investigation and action management process by managing L&I incident review board (IRB) meetings and coaching the Incident Managers on reviewing and approving the incident and investigations. Led driving safety self-verification (internal audit) process at site level, from planning to preparing and discussing the insights.

Key Contribution:

- Set site team up to manage the audit / oversight process, from planning and execution to reporting, presenting the outcomes and following up on the identified gaps.
- Ensured quality investigations, reports, and action creation and closure for investigations.

Performance Advisor - HSE Data Analyst Dec. 2015 - Dec. 2018 BP Exploration (Epsilon) Ltd www.bp.com	
Performance HSE Applications Custodian	<p>I was responsible to oversee HSE conformance & process across Operating and Supporting Functions by closely working with Oman Operating Functions HSE Managers. Responsible to monitor and compile Oman HSE Performance and report it to Leadership Table team as well as internal and external stakeholders. Reviewed and raised the quality of HSE data entries to ensure having reliable HSE data analysis. Led HSE self-verification (internal audit) process for both system and task levels, from planning to preparing the insights. Served as a Risk Champion for HSE team and collaborated with Functional Risk Engineers to manage Oman HSE and Risk Committee (SORC) meetings. Managed number of HSE systems Traction, IRIS, SharePoint and risk assurance tool (RAT).</p> <p>Key Contribution:</p> <ul style="list-style-type: none"> - Developed HSE Dashboard for BP Oman using business intelligence tool (Power BI). This dashboard has been added into the integrated Oman dashboard, in order to provide the Leadership Table with live data of HSE. - Led deployment process of new safety performance tool (IRIS) for BP Middle East, across the Operating Functions.
Senior QHSE Engineer - Cross Functional Auditor Jun 2013 - Oct 2015 Al-Taher Group (Electro Mechanics & SAM Engineering) www.altaher.com	
Quality Management HSE	<p>I was looking after maintaining the international quality & HSE integrated management systems (ISO9001), (ISO14001) & (OHSAS18001) for the company. Sustained improvement in departmental procedures (projects, tenders, procurement, drawings, transport & stores). Conducted integrated management system audits, safety walkdown inspections and quality & HSE site visit. Prepared quality and HSE plans, HSE and departments' forms and checklists.</p> <p>Key Contribution:</p> <ul style="list-style-type: none"> - Coordinated the development and implementation of Workflow Management System.
